

Audit Report

Testing content for the storytelling PDF previewer — not a real audit.

1. Scope

This document exercises the storytelling PDF previewer's native rendering path.

2. Findings

No real findings — this is a generated placeholder document with realistic layout (heading, body text, multiple pages) to verify pagination and scroll behavior inside the embedded PDF viewer.

3. Recommendation

None. This page intentionally left mundane.

Appendix

Second page — confirms multi-page PDFs paginate correctly in the viewer.
